QT ONE

The QT ONE Plan is designed for traders who want a fast and straightforward route to becoming funded.

Complete a single evaluation phase by meeting the trading objectives and following the trading rules. Once your account has successfully passed our Risk Review, you'll receive your funded account and can begin trading.

With a single evaluation phase, no recurring subscriptions, and a streamlined funding process, the QT ONE Plan offers a simple pathway for traders looking to prove their consistency and discipline.

How It Works

Purchase Your Evaluation

Purchase your QT ONE evaluation account and begin trading immediately.

Trade & Pass

Reach the 6% profit target while complying with all trading objectives and trading rules.

Risk Review

Once you pass the evaluation, your account will be reviewed by our Risk Team to ensure compliance with all trading rules.

Get Funded

Upon successful review, your funded account will be issued, allowing you to begin trading as a funded trader.

A fast and straightforward route designed to reward disciplined traders.

Evaluation Objectives

- 6% Profit Target
- Daily Drawdown Limit - 3% (Trailing)
- Maximum Drawdown Limit - 6% (Static)
- No minimum trading days, can pass in a single day
- No Consistency Score Requirement

Daily Drawdown Limit

The Daily Drawdown is 3% of your starting account balance and is recalculated at the start of each trading day based on the higher of your previous day's closing balance or closing equity.

This means the maximum daily loss amount remains fixed at 3% of the starting account size, but the daily loss threshold moves up whenever your previous day's closing balance or equity increases.

For a $10,000 account, the Daily Drawdown amount is always $300.

Example – $10,000 Account

Previous Day's Higher of Closing Balance / Equity	Daily Loss Limit	Daily Drawdown Threshold
$10,000	$300	$9,700
$11,000	$300	$10,700
$11,500	$300	$11,200

In this example, the Daily Drawdown amount remains fixed at $300 because it is based on the original account size. At the start of each trading day, the platform compares the previous day's closing balance and closing equity, uses whichever is higher, and subtracts $300 to determine the Daily Drawdown threshold for that day. This threshold is then fixed for the remainder of the trading day and is recalculated again at the start of the next trading day.

PERFORMANCE ACCOUNT

Reaching your QT ONE Funded Account is a significant achievement and demonstrates your ability to trade consistently.

To maintain your funded status, you must continue following the account rules and apply disciplined risk management while protecting your capital.

CORE RULE – Floating Loss Rule

The total floating loss on your account must not exceed 1% at any time.

The floating loss is calculated using the combined unrealized loss across all open positions. Exceeding this limit will result in a hard breach of your account.

Maximum Floating Loss: 1%

This rule applies to funded accounts only.

PERFORMANCE FEE POLICY

- Profit Split: 70%
- Trading Cycle: 4 Trading Days
- Minimum Trading Days: 4
- No Consistency Score Requirement

Once all payout requirements have been met, traders may request a payout after completing each 4-day trading cycle.

Please View the Full Rule Article here.

PROHIBITED by STRATEGIES

To ensure fair market participation and maintain a fair trading environment, all traders are required to comply with our Prohibited Strategies Policy.

Please View the Full Rule Article here.

MAXIMUM CAPITAL ALLOCATION

The Maximum Capital Allocation Rule applies across all funded accounts.

Please View the Full Rule Article here.

INACTIVITY RULE

All QT ONE accounts are subject to a 7-Day Inactivity Rule.

- For accounts where no trades have been placed, the inactivity period begins from the date the account is created.
- Once trading has commenced, the inactivity period is calculated from the date of the most recent closed trade.

If no trading activity occurs within the applicable 7-day period, the account will be considered inactive and will result in a hard breach.

This style is much cleaner and makes long FAQs much easier to scan. If your help desk supports horizontal rules (most do), they'll render as thin divider lines between sections.

QT TWO

The QT TWO Plan is designed for traders who prefer a structured evaluation process that rewards consistency, discipline, and responsible risk management.

Complete both evaluation phases by meeting the trading objectives and following the trading rules. Once you have successfully passed the evaluation and completed the Risk Review, you'll receive your funded account and begin your journey as a QT Funded trader.

How It Works

Purchase Your Evaluation

Purchase your **QT TWO** evaluation account and begin trading immediately.

Complete Phase 1

Achieve the 8% profit target while complying with all trading objectives and trading rules.

Complete Phase 2

Achieve the 5% profit target while continuing to meet all trading rules.

Risk Review

Once both phases have been successfully completed, your account will be reviewed by our Risk Team to ensure compliance with all trading rules.

Get Funded

Upon successful review, your funded account will be issued, allowing you to begin trading as a funded trader.

Evaluation Objectives

- Phase 1 Profit Target - 8%
- Phase 2 Profit Target - 5%
- Minimum Trading Days - 4 Days (Each Phase)
- Daily Drawdown Limit - 4%
- Maximum Drawdown Limit - 8% (Static)

Daily Drawdown Limit

The Daily Drawdown is fixed at **4% of your starting account balance** and does not increase as your account grows.

This means the maximum amount you can lose in a single trading day remains the same throughout the lifetime of the account.

For a **$10,000** account, the Daily Drawdown is always **$400**.

Example – $10,000 Account

Previous Day's Closing Balance	Daily Loss Limit	Daily Drawdown Threshold
$10,000	$400	$9,600
$11,000	$400	$10,600
$11,500	$400	$11,100

In this example, although the account balance increases, the Daily Drawdown remains fixed at **$400** because it is based on the original account size. The daily loss threshold is calculated by subtracting the fixed daily drawdown amount from the previous day's closing balance.

Evaluation Rules

In addition to meeting the evaluation objectives, all traders are expected to demonstrate disciplined and responsible risk management throughout the evaluation. Excessive exposure and high-risk trading behaviour are not permitted.

Exposure Rule

- Your total risk exposure must not exceed 75% of your Daily Drawdown Limit at any time during the evaluation.
- Engaging in high-risk or "all-or-nothing" trading behaviour is strictly prohibited.

Key Conditions

If your total risk exposure reaches or exceeds 75% of your Daily Drawdown Limit, the Risk Team may:

- Deny funding.
- Reset your account back to Phase 1.

The purpose of the evaluation is to assess consistent and disciplined trading rather than the ability to pass using a single high-risk trade.

PERFORMANCE ACCOUNT

Reaching your **QT TWO** Funded Account is a significant achievement and demonstrates your ability to trade consistently.

To maintain your funded status, you must continue following the account rules and apply disciplined risk management while protecting your capital.

CORE RULE – Floating Loss Rule

Your total floating loss must not exceed **1%** of your account balance at any time.

The floating loss is calculated using the combined unrealized loss across all open positions.

This rule applies to funded accounts only.

Breach Policy

- First Breach: Soft Breach
- Second Breach: Hard Breach

Maximum Floating Loss: 1%

Please View the Full Rule Article here.

CORE RULE – Stop Loss Rule

Every position opened on a funded account must have a Stop Loss applied within **60 seconds**.

Failure to comply with this requirement will result in a hard breach of the account.

This rule applies to funded accounts only.

PERFORMANCE FEE POLICY

QT TWO Accounts have a **5% Profit Cap per Cycle**. Any additional profit will be withdrawn from the account before your next cycle.

- Profit Split: 80%
- Trading Cycle: 14 Days
- Minimum Trading Days: 4 Days × 0.5% Profits
